## 1, 2, 3 Science Clipart Space Set

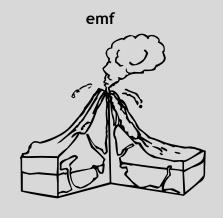

Welcome to 1, 2, 3 Science Clipart, the Space Set! This collection includes:

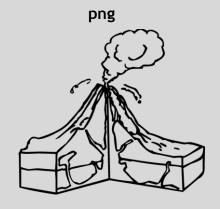

• **Space** - Provides images of the planets, the sun, moon phases, and representations of revolution and rotation.

## About the images...

All of the images in this set are presented in both .PNG and .EMF (Enhanced Meta File) format. PNG files can be edited in basic paint programs, but may become "fuzzy" when enlarged. EMF files are more clear when enlarged, but cannot be edited in most paint programs. Both formats maintain transparency, meaning they do not have a white box around them as would be found in JPEG images. In the examples below, the .jpeg is not as clear when enlarged, and also maintains a white "fill" inside and around the image. The .emf and .png images have a transparent "fill", making them appropriate to use on any background color.

**PNG** files can be previewed in a folder, but **EMF** files can be difficult to preview. Every effort has been made to make filenames as descriptive and logical as possible, and image guides have been provided on the following pages.
