

1, 2, 3 Science Clipart Space Set

Welcome to 1, 2, 3 Science Clipart, the Space Set! This collection includes:

- **Space** - Provides images of the planets, the sun, moon phases, and representations of revolution and rotation.

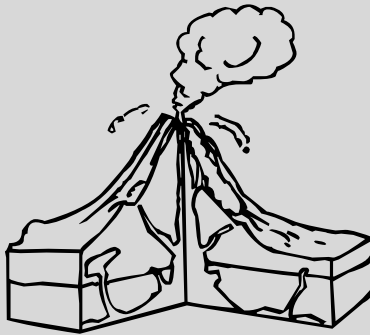

About the images...

All of the images in this set are presented in both **.PNG** and **.EMF** (Enhanced Meta File) format. **PNG** files can be edited in basic paint programs, but may become “fuzzy” when enlarged. **EMF** files are more clear when enlarged, but cannot be edited in most paint programs. Both formats maintain transparency, meaning they do not have a white box around them as would be found in **JPEG** images. In the examples below, the **.jpeg** is not as clear when enlarged, and also maintains a white “fill” inside and around the image. The **.emf** and **.png** images have a transparent “fill”, making them appropriate to use on any background color.

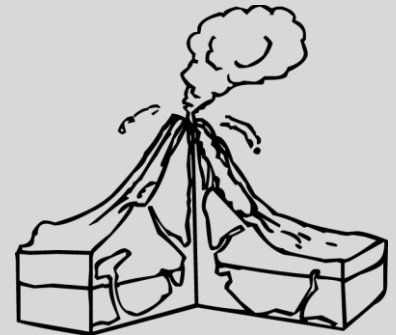

jpeg

png

PNG files can be previewed in a folder, but **EMF** files can be difficult to preview. Every effort has been made to make filenames as descriptive and logical as possible, and image guides have been provided on the following pages.
